

Thailand situation update on 13 July 2020

1. International Situation

As of 13 July 2020, there were a total of 13,041,499 confirmed cases with 58,660 patients in critical condition and 571,659 COVID-19 deaths across more than 210 countries, two Special Administrative Regions of the People's Republic of China (Hong Kong and Macau), and on cruise ships. The ten countries with the most confirmed COVID-19 cases include: the United States (3,413,995), Brazil (1,866,176), India (879,466), Russia (727,162), Peru (326,326), Chile (315,041), Spain (300,988), Mexico (299,750), England (289,603), and South Africa (276,242). The 23rd is the People's Republic of China (85,118 cases, as well as 1,470 and 46 cases in the Special Administrative Regions of Hong Kong and Macau, respectively).

2. The Disease Situation in Thailand

2.1 Surveillance Protocol for COVID-19

The accumulated data as of 12 July 2020 showed that 6,999,481 people had passed the entrances and exits at the international ports of entry. Of those, 2,061 people met the case definition criteria of patients under investigation (PUI), as shown in Table 1.

Table 1: Screening passengers at ports of entry

Ports of Entry	Total number of screened people	Total number of PUI
Total number	6,999,481	2,061
• Airport screening* (41,938 flights)	4,503,236	2,053
• Seaports**	156,802	2
• Ground ports***	2,118,122	6
• Renewing passports at the Government Complex Commemorating His Majesty at Chaengwattana Road****	221,321	0

Remark: Includes data starting from *January 3rd, **January 1st, ***February 1st, ****January 30th

2.2 Situation of Patients with Suspected Symptoms of COVID-19 in Thailand.

On 13 July 2020 at 20.00, Thailand announced that 1,547 additional people met the criteria for PUI, raising the total to 332,565 PUI, as shown in Table 2.

Table 2: Results of screening implementation to detect patients with suspected symptoms of COVID-19

Situation	Total number of PUI
Total number of laboratory tests	626,851
<ul style="list-style-type: none"> • People who met the PUI criteria 	332,565
<ul style="list-style-type: none"> • From the Active Case Finding 	9,775
<ul style="list-style-type: none"> • Returnees under state quarantine 	46,266
<ul style="list-style-type: none"> • People who did not meet the PUI criteria 	238,245
Total number of people who met the criteria of patients under investigation (PUI)	332,565
<ul style="list-style-type: none"> • Detected from ports of entry 	2,061
<ul style="list-style-type: none"> • Sought medical services on their own at hospitals (99,000 cases in Private hospitals, and 231,416 cases in Public hospital) 	330,416
<ul style="list-style-type: none"> • Notified by hotel residences, the Erawan Medical Center, local universities, tour groups and U-Tapao 	88
Confirmed cases	3,220
<ul style="list-style-type: none"> • Recovered and discharged from hospitals 	3,090
<ul style="list-style-type: none"> • Undergoing Treatment 	72
<ul style="list-style-type: none"> • Deaths 	58
Characteristics of Infection in Confirmed cases	3,222
<ul style="list-style-type: none"> • Local Transmission 	2,444
<ul style="list-style-type: none"> • Imported Cases 	776
<ul style="list-style-type: none"> - Designated Quarantine Places* 	279

Notice: *Quarantine measures for travelers from abroad have been in effect since 3 April 2020

The median age of the confirmed cases is 37 years old (ranging from 1 month to 97 years old). 1,778 cases are male, and 1,442 cases are female (the ratio of male to female is 1.23:1). In terms of nationality, 2,881 cases are Thai, 328 cases are foreigners, and data is not available for the remaining 11 cases.

201 cases were reported with underlying diseases and 3,019 cases reported without any underlying disease. 40 cases were detected from the screening protocol at airports (one case was found within the group of Thai workers returning from Wuhan). 1,588 cases sought medical treatment by themselves, 1,189 cases were tracked via case investigation and defined

as “close contacts.” A total of 55 confirmed cases were found from the active case finding measures.

3. Thailand Precautions

- Grand Prix International Public Company Limited or GPI is organizing the 41st Bangkok International Motor Show 2020 under the theme "Inspiration Unlocks The Future" at Challenger 1 - 3, Impact Muang Thong Thani. The company has prepared 'New Normal' screening measures and sanitary measures for people who go to the motor show and for relevant staff. All 'pretty' staff, hired staff, and people who enter the building must have temperature checks, wear face masks at all times, and maintain a distance of 1 meter from other persons. Staff are provided in the building to inform attendees of necessary and related information. Precaution measures signs are also provided within booths in the hall room to ensure people's safety.

4. Risk Communication to the Public

- In case of traveling to areas and across areas by public transport, the public transport operator must prepare the system and comply with the disease control measures, i.e. cleaning the vehicle, screening passengers, encouraging passengers to wear a mask, limiting bus services during certain periods, arranging distance between seats, and limiting the number of passengers. Customers must wear a mask at all times while traveling, refrain from talking and eating on public transport, and register each time they enter/leave the service area.

- For other business places/enterprises, operators are recommended to keep the areas clean, encourage people to wear a mask, limit the number of customers in accordance with the COVID-19 control measures.

- For people visiting crowded places or closed areas such as meeting rooms, department stores, and movie theatres, they are recommended to wear a mask, keep a distance of at least 1-2 meters from other people, and limit contact with other people to be only for a short period of time.

-Regularly wash hands with water and soap or use alcohol gel. Avoid touching your eyes, nose, and mouth with your hands.

-Do not use or share personal stuff with others (i.e. handkerchiefs, glasses, and towels) since pathogens causing respiratory disease can be transmitted to other people through secretions.

-Avoid eating raw food.
