

Thailand situation update on 29 July 2020

1. International Situation

As of 29 July 2020, there were a total of 16,916,860 confirmed cases with 66,459 patients in critical condition and 663,909 COVID-19 deaths across more than 210 countries, two Special Administrative Regions of the People's Republic of China (Hong Kong and Macau), and on cruise ships. The ten countries with the most confirmed COVID-19 cases include: the United States (4,498,343), Brazil (2,484,649), India (1,535,335), Russia (828,990), South Africa (459,761), Mexico (402,697), Peru (395,005), Chile (349,800), Spain (327,690), and England (300,692). The 28th is the People's Republic of China (86,991 cases, as well as 2,885 and 46 cases in the Special Administrative Regions of Hong Kong and Macau, respectively).

2. The Disease Situation in Thailand

2.1 Surveillance Protocol for COVID-19

The accumulated data as of 28 July 2020 showed that 7,092,955 people had passed through the international ports of entry. Of those, 2,453 people met the case definition criteria of patients under investigation (PUI), as shown in Table 1.

Table 1: Screening passengers at ports of entry

Ports of Entry	Total number of screened people	Total number of PUI
Total number	7,092,955	2,453
• Airport screening* (42,882 flights)	4,528,331	2,439
• Seaports**	160,884	2
• Ground ports***	2,168,867	12
• Renewing passports at the Government Complex Commemorating His Majesty at Chaengwattana Road****	234,873	0

Remark: Includes data starting from *January 3rd, **January 1st, ***February 1st, ****January 30th

2.2 Situation of Patients with Suspected Symptoms of COVID-19 in Thailand.

On 29 July 2020 at 12.00, Thailand announced that 1,070 additional people met the criteria for PUI, raising the total to 370,078 PUI, as shown in Table 2.

The Coronavirus Disease 2019 Situation

Characteristics of Infection in Confirmed cases	3,298
<ul style="list-style-type: none"> • Local Transmission 	2,444
<ul style="list-style-type: none"> • Imported Cases 	854
<ul style="list-style-type: none"> - Designated Quarantine Places* 	361

Notice: *Quarantine measures for travelers from abroad have been in effect since 3 April 2020

The median age of the confirmed cases is 37 years old (ranging from 1 month to 97 years old). 1,830 cases are male, and 1,468 cases are female (the ratio of male to female is 1.23:1). In terms of nationality, 2,959 cases are Thai, 330 cases are foreigners, and data is not available for the remaining 9 cases.

202 cases were reported with underlying diseases and 3,096 cases reported without any underlying disease. 40 cases were detected from the screening protocol at airports (one case was found within the group of Thai workers returning from Wuhan). 1,588 cases sought medical treatment by themselves, 1,189 cases were tracked via case investigation and defined as “close contacts.” A total of 55 confirmed cases were found from the active case finding measures.

3. Thailand Precautions

- The Department of Health Service Support, MoPH visited the Suvarnabhumi Airport in order to receive the international patients who join the Medical and Wellness Program and prepare the system for following-up the quarantine implementation at hospitals.
- The Interior Ministry Permanent Secretary Chatchai Phromlert and Director of the Centre for Covid-19 Situation Administration (CCSA) stated that a concert was held and did not follow the regulations and measures as prescribed by the CCSA. The CCSA ordered the Provincial Committee of Communicable Disease Committee to organize to set measures for certain activities and to consider prioritizing and permitting certain activities. Organizers of the events will be given clarification and must strictly comply with the regulations and orders as prescribed by CCSA and the Ministry of Public Health. Those who do not comply with the requirements and orders, will face further action from the authority of the CCSA.

4. Risk Communication to the Public

- In case of traveling to areas and across areas by public transport, the public transport operator must prepare the system and comply with the disease control measures, i.e. cleaning the vehicle, screening passengers, encouraging passengers to wear a mask, limiting bus services during certain periods, arranging distance between seats, and limiting the number of passengers. Customers must wear a mask at all times while traveling, refrain from talking and eating on public transport, and register each time they enter/leave the service area.

- For other business places/enterprises, operators are recommended to keep the areas clean, encourage people to wear a mask, limit the number of customers in accordance with the COVID-19 control measures.

- For people visiting crowded places or closed areas such as meeting rooms, department stores, and movie theatres, they are recommended to wear a mask, keep a distance of at least 1-2 meters from other people, and limit contact with other people to be only for a short period of time.

-Regularly wash hands with water and soap or use alcohol gel. Avoid touching your eyes, nose, and mouth with your hands.

-Do not use or share personal stuff with others (i.e. handkerchiefs, glasses, and towels) since pathogens causing respiratory disease can be transmitted to other people through secretions.

-Avoid eating raw food.
