Remark: Includes data starting from *January 3rd, **January 1st, ***February 1st, ****January 30th

2.2 Situation of Patients with Suspected Symptoms of COVID-19 in Thailand.

On 6 August 2020 at 12.00, Thailand announced that 1,447 additional people met the criteria for PUI, raising the total to 383,217 PUI, as shown in Table 2.

Table 2: Results of screening implementation to detect patients with suspected symptoms of COVID-19

Situation	Total number of PUI
Total number of laboratory tests	754,750
People who met the PUI criteria	383,217
From the Active Case Finding	9,775
Returnees under state quarantine	66,906
People who did not meet the PUI criteria	294,852
Total number of people who met the criteria of patients under investigation (PUI)	383,217
Detected from ports of entry	2,530
 Sought medical services on their own at hospitals (119,535 cases in private hospitals, and 261,064 cases in public hospitals) 	380,599
 Notified by hotel residences, the Erawan Medical Center, local universities, tour groups and U-Tapao 	88
Confirmed cases	3,330
Recovered and discharged from hospitals	3,148
Undergoing Treatment	124
• Deaths	58
Characteristics of Infection in Confirmed cases	3,330
Local Transmission	2,444
Imported Cases	886
- Designated Quarantine Places*	393

Notice: *Quarantine measures for travelers from abroad have been in effect since 3 April 2020

The median age of the confirmed cases is 37 years old (ranging from 1 month to 97 years old). 1,853 cases are male, and 1,477 cases are female (the ratio of male to female is 1.23:1). In terms of nationality, 2,987 cases are Thai, 334 cases are foreigners, and data is not available for the remaining 9 cases.

206 cases were reported with underlying diseases and 3,124 cases reported without any underlying disease. 40 cases were detected from the screening protocol at airports (one case was found within the group of Thai workers returning from Wuhan). 1,588 cases sought medical treatment by themselves, 1,189 cases were tracked via case investigation and defined as "close contacts." A total of 55 confirmed cases were found from the active case finding measures.

3. Thailand Precautions

- The Director-General of the Department of Health, Ministry of Public Health stated about gathering in groups. The director requested cooperation to only sit at specified points and asked people to follow the measures. Same-family groups can sit together in small groups but it is not recommended to sit in large family groups. There are 2 options for buffet food lines: (1) staff offer food to customers at the buffet food line, the customers have to hold their container to the staffs and choose food, (2) staff provide utensils to customers and it must be used for each customers only and they are not allowed to share their personal dining spoons with others.
- The MoPH and Ministry of Tourism and Sports determined the standards called "Amazing Thailand Safety & Health Administration (SHA) " under the "3C" concept as follows :

1. Clean:

- Public Toilets are clean in accordance with the standard titled "Healthy Accessibility Safety" (HAS)

- promoting the "Clean food Good Taste and Street Food Good Health"

2. Care: Green and Clean Hospitals which realize the importance of the environment

3. Clear: Good ventilation systems are set in the service places.

Tourists can check the list of business places/enterprises that are under the standards and can provide recommendations for service improvement through the online system created by the Tourism Authority of Thailand

4. Risk Communication to the Public

- In case of traveling to areas and across areas by public transport, the public transport operator must prepare the system and comply with the disease control measures, i.e. cleaning the vehicle, screening passengers, encouraging passengers to wear a mask, limiting bus services during certain periods, arranging distance between seats, and limiting the number of passengers. Customers must wear a mask at all times while traveling, refrain from talking and eating on public transport, and register each time they enter/leave the service area.

- For other business places/enterprises, operators are recommended to keep the areas clean, encourage people to wear a mask, limit the number of customers in accordance with the COVID-19 control measures.

- For people visiting crowded places or closed areas such as meeting rooms, department stores, and movie theatres, they are recommended to wear a mask, keep a distance of at least 1-2 meters from other people, and limit contact with other people to be only for a short period of time.

-Regularly wash hands with water and soap or use alcohol gel. Avoid touching your eyes, nose, and mouth with your hands.

-Do not use or share personal stuff with others (i.e. handkerchiefs, glasses, and towels) since pathogens causing respiratory disease can be transmitted to other people through secretions.

-Avoid eating raw food.
