

Thailand situation update on 2 September 2020

1. International Situation

As of 2 September 2020, there were a total of 25,917,000 confirmed cases with 60,544 patients in critical condition and 861,494 COVID-19 deaths across more than 213 countries, two Special Administrative Regions of the People's Republic of China (Hong Kong and Macau), and on cruise ships. The ten countries with the most confirmed COVID-19 cases include: the United States (6,257,938), Brazil (3,952,790), India (3,769,523), Russia (1,005,000), Peru (657,129), South Africa (628,259), Colombia (624,069), Mexico (606,036), Spain (470,973), and Argentina (428,239). The 38th is the People's Republic of China (89,935 cases, as well as 4,823 and 46 cases in the Special Administrative Regions of Hong Kong and Macau, respectively).

2. The Disease Situation in Thailand

2.1 Surveillance Protocol for COVID-19

The accumulated data as of 1 September 2020 showed that 7,296,323 people had passed through the international ports of entry. Of those, 2,882 people met the case definition criteria of patients under investigation (PUI), as shown in Table 1.

Table 1: Screening passengers at ports of entry

Ports of Entry	Total number of screened people	Total number of PUI
Total number	7,296,323	2,882
• Airport screening* (45,004 flights)	4,581,884	2,863
• Seaports**	169,263	2
• Ground ports***	2,276,122	17
• Renewing passports at the Government Complex Commemorating His Majesty at Chaengwattana Road****	269,054	0

Remark: Includes data starting from *January 3rd, **January 1st, ***February 1st, ****January 30th

2.2 Situation of Patients with Suspected Symptoms of COVID-19 in Thailand.

On 2 September 2020 at 12.00, Thailand announced that 1,373 additional people met the criteria for PUI, raising the total to 421,343 PUI, as shown in Table 2.

<ul style="list-style-type: none"> Undergoing Treatment 	90
<ul style="list-style-type: none"> Deaths 	58
Characteristics of Infection in Confirmed cases	3,425
<ul style="list-style-type: none"> Local Transmission 	2,444
<ul style="list-style-type: none"> Imported Cases 	981
<ul style="list-style-type: none"> - Designated Quarantine Places* 	488

Notice: *Quarantine measures for travelers from abroad have been in effect since 3 April 2020

The median age of the confirmed cases is 34 years old (ranging from 1 month to 97 years old). 1,913 cases are male, and 1,513 cases are female (the ratio of male to female is 1.23:1). In terms of nationality, 3,064 cases are Thai, 352 cases are foreigners, and data is not available for the remaining 9 cases.

208 cases were reported with underlying diseases and 3,217 cases reported without any underlying disease. 40 cases were detected from the screening protocol at airports (one case was found within the group of Thai workers returning from Wuhan). 1,588 cases sought medical treatment by themselves, 1,189 cases were tracked via case investigation and defined as “close contacts.” A total of 55 confirmed cases were found from the active case finding measures.

3. Thailand Precautions

- Prachuap Khiri Khan Province disinfected all arrival trucks and prohibited people and vehicles from Myanmar from entering Thailand. The products are to be transferred to trucks of Thai businesses and Thai workers. All Thai workers are required to wear masks and boots. After completing the task and passing the border, the officials spray disinfectant on all wheels of cargo trucks. Also, public health officers will screen the temperature of those passing through. Everyone has to sign in and out and clean their hands with hand sanitizer.
- Tak Province tightened measures against COVID-19 in all districts along the border area by implementing intensive control measures, and setting up checkpoints and joint checkpoints. Staff from related departments including provincial administration staff, police, soldiers,
- the Control Division Infantry Regiment Task Force 4, police from the Border Patrol Police Company 346, assistant sub-district headmen, village headmen, assistant village headmen, village security teams, and village health volunteers are working together to block undocumented immigrants from neighboring countries into Thailand and to monitor and prevent the spread of coronavirus COVID-19 with 24-hour intensive control.
- Phuket has launched the project “Phuket Model” and implemented the “Safe & Sealed Area for Tourism” project to support the international tourists entering the province. Under this project, the tourists will be limited to visit the areas and are requested to have their COVID-19 test results from their country of origin. When the tourists arrive at the Thai airport, they will be tested again and quarantined at the designated hotel for 14 days (during the quarantine period, they will be tested twice). After completing 14 days of quarantine, they will be able to travel around Phuket under the same conditions as Thai people returning from abroad. In case they want to travel outside Phuket, they will be more quarantined for 7 days until the completion of 21 days.

4. Risk Communication to the Public

- In case of traveling to areas and across areas by public transport, the public transport operator must prepare the system and comply with the disease control measures, i.e. cleaning the vehicle, screening passengers, encouraging passengers to wear a mask,

by Emergency Operations Center, Department of Disease Control

limiting bus services during certain periods, arranging distance between seats, and limiting the number of passengers. Customers must wear a mask at all times while traveling, refrain from talking and eating on public transport, and register each time they enter/leave the service area.

- For other business places/enterprises, operators are recommended to keep the areas clean, encourage people to wear a mask, limit the number of customers in accordance with the COVID-19 control measures.

- For people visiting crowded places or closed areas such as meeting rooms, department stores, and movie theatres, they are recommended to wear a mask, keep a distance of at least 1-2 meters from other people, and limit contact with other people to be only for a short period of time.

-Regularly wash hands with water and soap or use alcohol gel. Avoid touching your eyes, nose, and mouth with your hands.

-Do not use or share personal stuff with others (i.e. handkerchiefs, glasses, and towels) since pathogens causing respiratory disease can be transmitted to other people through secretions.

-Avoid eating raw food.

The crucial measures in Thailand regarding the Myanmar situation

1. Surveillance in 10 provinces that border Myanmar: Kanchanaburi, Chumphon, Chiang Rai, Chiang Mai, Tak, Prachuap Khiri Khan, Phetchaburi, Mae Hong Son, Ranong, and Ratchaburi, as well as tightening enforcement of Burmese workers who come to work or live in Thailand.

2. Increasing the intensity of screening and prevention for undocumented people who cross the border (at fixed border crossing channels, special commercial points, special relief points, and natural channels).
3. Prachuap Khiri Khan Province disinfected all arrival trucks and prohibited people and vehicles from Myanmar from entering Thailand. The products are to be transferred to trucks of Thai businesses and Thai workers. All Thai workers are required to wear masks and boots. After completing the task and passing the border, the officials spray disinfectant on all wheels of cargo trucks. Also, public health officers will screen the temperature of those passing through. Everyone has to sign in and out and clean their hands with hand sanitizer.
4. Tak province added measures to control all districts that have a border area. These measures are to control checkpoints and roadblock points for all agencies i.e. public authorities, policemen, 4th infantry regiment task forces, border patrol police 346, sub-district headmen, sub-district headman assistants, village headmen, village headmen assistants, village security staff, and village health volunteers. The controls are to limit the undocumented migrations of people who come to Thailand from neighboring countries and include 24-hour surveillance to prevent the spread of COVID-19.
