

Thailand situation update on 5 September 2020

1. International Situation

As of 5 September 2020, there were a total of 26,816,845 confirmed cases with 60,908 patients in critical condition and 879,369 COVID-19 deaths across more than 213 countries, two Special Administrative Regions of the People's Republic of China (Hong Kong and Macau), and on cruise ships. The ten countries with the most confirmed COVID-19 cases include: the United States (6,389,413), Brazil (4,091,801), India (4,027,718), Russia (1,020,310), Peru (676,848), Colombia (650,062), South Africa (635,078), Mexico (623,090), Spain (517,133), and Argentina (461,882). The 38th is the People's Republic of China (90,009 cases, as well as 4,851 and 46 cases in the Special Administrative Regions of Hong Kong and Macau, respectively).

2. The Disease Situation in Thailand

2.1 Surveillance Protocol for COVID-19

The accumulated data as of 4 September 2020 showed that 7,313,816 people had passed through the international ports of entry. Of those, 2,899 people met the case definition criteria of patients under investigation (PUI), as shown in Table 1.

Table 1: Screening passengers at ports of entry

Ports of Entry	Total number of screened people	Total number of PUI
Total number	7,313,816	2,899
• Airport screening* (45,179 flights)	4,586,066	2,880
• Seaports**	169,930	2
• Ground ports***	2,285,159	17
• Renewing passports at the Government Complex Commemorating His Majesty at Chaengwattana Road****	272,661	0

Remark: Includes data starting from *January 3rd, **January 1st, ***February 1st, ****January 30th

2.2 Situation of Patients with Suspected Symptoms of COVID-19 in Thailand.

On 5 September 2020 at 12.00, Thailand announced that 649 additional people met the criteria for PUI, raising the total to 424,001 PUI, as shown in Table 2.

The Coronavirus Disease 2019 Situation

by Emergency Operations Center, Department of Disease Control

Table 2: Results of screening implementation to detect patients with suspected symptoms of COVID-19

Situation	Total number of PUI

<ul style="list-style-type: none"> • Local Transmission 	2,445
<ul style="list-style-type: none"> • Imported Cases 	993
<ul style="list-style-type: none"> - Designated Quarantine Places* 	500

Notice: *Quarantine measures for travelers from abroad have been in effect since 3 April 2020

The median age of the confirmed cases is 36 years old (ranging from 1 month to 97 years old). 1,922 cases are male, and 1,516 cases are female (the ratio of male to female is 1.27:1). In terms of nationality, 3,070 cases are Thai, 359 cases are foreigners, and data is not available for the remaining 9 cases.

209 cases were reported with underlying diseases and 3,229 cases reported without any underlying disease. 40 cases were detected from the screening protocol at airports (one case was found within the group of Thai workers returning from Wuhan). 1,588 cases sought medical treatment by themselves, 1,189 cases were tracked via case investigation and defined as “close contacts.” A total of 55 confirmed cases were found from the active case finding measures.

3. Thailand Precautions

- MoPH reported the progress on COVID-19 prevention and control, especially the case of the prisoner who tested positive for SARS-CoV-2 while quarantined in prison. According to the disease investigation, this prisoner may have gotten the infection from people who returned from abroad and attended the pub where he worked with or he could have gotten the infection from people who were asymptomatic for COVID-19. For the concern about the cluster outbreak among close contacts, DDC and Nonthaburi Provincial Health Office have already tracked the close contacts and brought them to the quarantine facility, therefore, they are confident that there will be no cluster of the outbreak.
- The Institute for Urban Disease Control and Prevention, Department of Disease Control has implemented active case finding by sending the royal biosafety sample collection vehicle into the area at Baan Suan Tho, Phutthabucha Road, Bang Mot, Thung Khru, Bangkok to detect SARS-CoV-2 among residents according to disease control measures. From the disease investigation, it was found that the recently confirmed infected person lived with their family in a condo in that area. Those who get tested for COVID-19 have to register to receive lab testing codes for COVID-19, and also provide travel history. They will then receive a test kit and their samples will be collected for testing. It is expected that test results for SARS-CoV will be available within 1-2 days.
- At Tak Province, due to the COVID-19 outbreak in Myanmar, Chinese and Thai people who are online casino employees in Myanmar have suffered and fear the disease outbreak. They tried to cross the border to Thailand without documentation. On September 5, 2020 at 1:00 AM., military staff arrested 6 undocumented migrants attempting to cross into Thailand by taking a paddle boat across the Moei River, including 5 Thai people and 1 Chinese person.

4. Risk Communication to the Public

- In case of traveling to areas and across areas by public transport, the public transport operator must prepare the system and comply with the disease control measures, i.e. cleaning the vehicle, screening passengers, encouraging passengers to wear a mask, limiting bus services during certain periods, arranging distance between seats, and limiting the number of passengers. Customers must wear a mask at all times while traveling, refrain

from talking and eating on public transport, and register each time they enter/leave the service area.

- For other business places/enterprises, operators are recommended to keep the areas clean, encourage people to wear a mask, limit the number of customers in accordance with the COVID-19 control measures.

- For people visiting crowded places or closed areas such as meeting rooms, department stores, and movie theatres, they are recommended to wear a mask, keep a distance of at least 1-2 meters from other people, and limit contact with other people to be only for a short period of time.

-Regularly wash hands with water and soap or use alcohol gel. Avoid touching your eyes, nose, and mouth with your hands.

-Do not use or share personal stuff with others (i.e. handkerchiefs, glasses, and towels) since pathogens causing respiratory disease can be transmitted to other people through secretions.

-Avoid eating raw food.

Special Report

“The Myanmar COVID-19 Situation on 5 September 2020”

1. The COVID-19 Situation in Myanmar

The crucial measures in Thailand regarding the Myanmar situation

1. Surveillance in 10 provinces that border Myanmar: Kanchanaburi, Chumphon, Chiang Rai, Chiang Mai, Tak, Prachuap Khiri Khan, Phetchaburi, Mae Hong Son, Ranong, and Ratchaburi, as well as tightening enforcement upon Burmese workers who come to work or live in Thailand.
2. Increasing the intensity of screening and prevention for undocumented people who cross the border (at fixed border crossing channels, special commercial points, special relief points, and natural channels).
3. Prachuap Khiri Khan Province is disinfecting all arriving trucks and prohibited people and vehicles from Myanmar from entering Thailand. The products are to be transferred to trucks of Thai businesses and Thai workers. All Thai workers are required to wear masks and boots. After completing the task and passing the border, the officials spray disinfectant on all wheels of cargo trucks. Also, public health officers will screen the temperature of those passing through. Everyone has to sign in and out and clean their hands with hand sanitizer.
4. Tak province added measures to control all districts that have a border area. These measures are to control checkpoints and roadblock points for all agencies i.e. public authorities, policemen, 4th infantry regiment task forces, border patrol police 346, sub-district headmen, sub-district headman assistants, village headmen, village headmen assistants, village security staff and village health volunteers. The controls are to limit the undocumented migrations of people who come to Thailand from neighboring countries and include 24-hour surveillance to prevent the spread of COVID-19.
5. Mr. Anutin Charnvirakul, Deputy Prime Minister and Minister of Public Health advised people not to worry about COVID-19 in the Republic of Myanmar. Currently, all sectors along the Thai border are cooperating to tighten the measures and are asking Thai people's cooperation in not facilitating the movement of the undocumented immigrant population into the Thailand, especially for business operators. They have been requested to not accept undocumented foreign workers because of the risk of spreading the infection in the country.
6. General Apirat Kongsompong, the Chief of the Royal Thai Army visited Tha Kham Kalum and Tha Kham Som-O at Maesai District, Chiang Rai Province with the main objective of updating the COVID-19 situation and following up the Phamuang Force's measures to screen undocumented entries into the country. This kind of screening is implemented to prevent the spread of COVID-19 from Myanmar.
