

Thailand situation update on 30 September 2020

1. International Situation

As of 30 September 2020, there were a total of 33,875,113 confirmed cases with 65,996 patients in critical condition and 1,013,195 COVID-19 deaths across more than 213 countries, two Special Administrative Regions of the People's Republic of China (Hong Kong and Macau), and on cruise ships. The ten countries with the most confirmed COVID-19 cases include: the United States (7,406,729), India (6,229,474), Brazil (4,780,317), Russia (1,176,286), Colombia (824,042), Peru (811,768), Spain (758,172), Mexico (738,163), Argentina (736,609), and South Africa (672,572). The 44th is the People's Republic of China (90,529 cases, as well as 5,080 and 46 cases in the Special Administrative Regions of Hong Kong and Macau, respectively).

2. The Disease Situation in Thailand

2.1 Surveillance Protocol for COVID-19

The accumulated data as of 29 September 2020 showed that 7,458,299 people had passed through the international ports of entry. Of those, 3,124 people met the case definition criteria of patients under investigation (PUI), as shown in Table 1.

Table 1: Screening passengers at ports of entry

Ports of Entry	Total number of screened people	Total number of PUI
Total number	7,458,299	3,124
• Airport screening* (46,718 flights)	4,622,762	3,104
• Seaports**	175,596	2
• Ground ports***	2,349,061	18
• Renewing passports at the Government Complex Commemorating His Majesty at Chaengwattana Road****	310,880	0

Remark: Includes data starting from *January 3rd, **January 1st, ***February 1st, ****January 30th

2.2 Situation of Patients with Suspected Symptoms of COVID-19 in Thailand.

On 30 September 2020 at 12.00, Thailand announced that 1,057 additional people met the criteria for PUI, raising the total to 451,067 PUI, as shown in Table 2.

Table 2: Results of screening implementation to detect patients with suspected symptoms of COVID-19

Situation	Total number of PUI
Total number of laboratory tests	878,477
<ul style="list-style-type: none"> People who met the PUI criteria 	451,067
<ul style="list-style-type: none"> From the Active Case Finding 	15,834
<ul style="list-style-type: none"> Returnees under state quarantine 	81,676
<ul style="list-style-type: none"> People who did not meet the PUI criteria 	329,900
Total number of people who met the criteria of patients under investigation (PUI)	451,067
<ul style="list-style-type: none"> Detected from ports of entry 	3,124
<ul style="list-style-type: none"> Sought medical services on their own at hospitals (141,622 cases in private hospitals, and 306,233 cases in public hospitals) 	447,855
<ul style="list-style-type: none"> Notified by hotel residences, the Erawan Medical Center, local universities, tour groups and U-Tapao 	88
Confirmed cases	3,564
<ul style="list-style-type: none"> Recovered and discharged from hospitals 	3,374
<ul style="list-style-type: none"> Undergoing Treatment 	131
<ul style="list-style-type: none"> Deaths 	59
Characteristics of Infection in Confirmed cases	3,564
<ul style="list-style-type: none"> Local Transmission 	2,445
<ul style="list-style-type: none"> Imported Cases 	1,119
- Designated Quarantine Places*	626

Notice: *Quarantine measures for travelers from abroad have been in effect since 3 April 2020

The median age of the confirmed cases is 36 years old (ranging from 1 month to 97 years old). 2,012 cases are male, and 1,552 cases are female (the ratio of male to female is 1.28:1). In terms of nationality, 3,165 cases are Thai, 390 cases are foreigners, and data is not available for the remaining 9 cases.

213 cases were reported with underlying diseases and 3,351 cases reported without any underlying disease. 40 cases were detected from the screening protocol at airports (one case was found within the group of Thai workers returning from Wuhan). 1,588 cases sought medical treatment by themselves, 626 cases were positive from the state quarantine supported by the government. A total of 55 confirmed cases were found from the active case finding measures.

3. Thailand Precautions

- Trang Province's Deputy Director of the Center for the Protection of National Marine Interests revealed that the Center for COVID-19 Situation Administration (CCSA) maintains intensive measures in the screening and quarantine processes for persons entering the Trang area by boat. These procedures are in accordance with measures and guidelines specified by the Center for COVID-19 Situation Administration (CCSA). There is also integration and collaboration with Trang Province immigration and public health in Kantang District. A boat at Kantang that traveled from Penang Malaysia was investigated through passport examinations and fever screenings. This investigation found a total of 7 seafarers, all of whom had valid immigration documents and didn't have symptoms corresponding to the case definition for COVID-19.

4. Risk Communication to the Public

- In case of traveling to areas and across areas by public transport, the public transport operator must prepare the system and comply with the disease control measures, i.e. cleaning the vehicle, screening passengers, encouraging passengers to wear a mask, limiting bus services during certain periods, arranging distance between seats, and limiting the number of passengers. Customers must wear a mask at all times while traveling, refrain from talking and eating on public transport, and register each time they enter/leave the service area.

- For other business places/enterprises, operators are recommended to keep the areas clean, encourage people to wear a mask, limit the number of customers in accordance with the COVID-19 control measures.

- For people visiting crowded places or closed areas such as meeting rooms, department stores, and movie theatres, they are recommended to wear a mask, keep a distance of at least 1-2 meters from other people, and limit contact with other people to be only for a short period of time.

-Regularly wash hands with water and soap or use alcohol gel. Avoid touching your eyes, nose, and mouth with your hands.

-Do not use or share personal stuff with others (i.e. handkerchiefs, glasses, and towels) since pathogens causing respiratory disease can be transmitted to other people through secretions.

The Coronavirus Disease 2019 Situation
