<ul style="list-style-type: none"> • Local Transmission 	2,445
<ul style="list-style-type: none"> • Imported Cases 	1,138
<ul style="list-style-type: none"> - Designated Quarantine Places* 	645

Notice: *Quarantine measures for travelers from abroad have been in effect since 3 April 2020

The median age of the confirmed cases is 36 years old (ranging from 1 month to 97 years old). 2,023 cases are male, and 1,560 cases are female (the ratio of male to female is 1.3:1). In terms of nationality, 3,171 cases are Thai, 403 cases are foreigners, and data is not available for the remaining 9 cases.

213 cases were reported with underlying diseases and 3,370 cases reported without any underlying disease. 40 cases were detected from the screening protocol at airports (one case was found within the group of Thai workers returning from Wuhan). 1,588 cases sought medical treatment by themselves, 645 cases were positive from the state quarantine supported by the government. A total of 55 confirmed cases were found from the active case finding measures.

3. Thailand Precautions

- The Deputy Director-General of the Department of Fisheries revealed that the Xinfadi market, which is the largest vegetable, fruit and meat wholesale market in Beijing, had expressed its interest in purchasing Thai agricultural products starting with fishery products. The condition is that the product must be accompanied with a certificate of compliance with preventive measures for SARS-CoV-2 contamination-free in exported food products according to the Single Joint Certificate of the Ministry of Public Health, Ministry of Industry, Ministry of Commerce and Ministry of Agriculture and Cooperatives for all exported food products. The certification will be effective from 1 November 2020 onward.

4. Risk Communication to the Public

- In case of traveling to areas and across areas by public transport, the public transport operator must prepare the system and comply with the disease control measures, i.e. cleaning the vehicle, screening passengers, encouraging passengers to wear a mask, limiting bus services during certain periods, arranging distance between seats, and limiting the number of passengers. Customers must wear a mask at all times while traveling, refrain from talking and eating on public transport, and register each time they enter/leave the service area.
 - For other business places/enterprises, operators are recommended to keep the areas clean, encourage people to wear a mask, limit the number of customers in accordance with the COVID-19 control measures.
 - For people visiting crowded places or closed areas such as meeting rooms, department stores, and movie theatres, they are recommended to wear a mask, keep a distance of at least 1-2 meters from other people, and limit contact with other people to be only for a short period of time.
- Regularly wash hands with water and soap or use alcohol gel. Avoid touching your eyes, nose, and mouth with your hands.
- Do not use or share personal stuff with others (i.e. handkerchiefs, glasses, and towels) since pathogens causing respiratory disease can be transmitted to other people through secretions.
- Avoid eating raw food.
