

Thailand situation update on 1 November 2020

1. International Situation

As of 1 November 2020, there were a total of 46,432,919 confirmed cases with 84,280 patients in critical condition and 1,200,932 COVID-19 deaths across more than 216 countries, two Special Administrative Regions of the People's Republic of China (Hong Kong and Macau), and on cruise ships. The ten countries with the most confirmed COVID-19 cases include: the United States (9,402,708), India (8,184,082), Brazil (5,535,605), Russia (1,636,781), France (1,367,625), Spain (1,264,517), Argentina (1,166,924), Colombia (1,074,184), England (1,011,660), and Mexico (924,962). The 56th is the People's Republic of China (91,374 cases, as well as 5,331 and 46 cases in the Special Administrative Regions of Hong Kong and Macau, respectively).

2. The Disease Situation in Thailand

2.1 Surveillance Protocol for COVID-19

The accumulated data as of 31 October 2020 showed that 7,615,356 people had passed through the international ports of entry. Of those, 3,435 people met the case definition criteria of patients under investigation (PUI), as shown in Table 1.

Table 1: Screening passengers at ports of entry

| Ports of Entry | Total number of screened people | Total number of PUI |
|--|---------------------------------|---------------------|
| Total number | 7,615,356 | 3,435 |
| • Airport screening* (49,012 flights) | 4,672,962 | 3,415 |
| • Seaports** | 182,272 | 2 |
| • Ground ports*** | 2,414,985 | 18 |
| • Renewing passports at the Government Complex Commemorating His Majesty at Chaengwattana Road**** | 345,137 | 0 |

Remark: Includes data starting from *January 3rd, **January 1st, ***February 1st, ****January 30th

2.2 Situation of Patients with Suspected Symptoms of COVID-19 in Thailand.

On 1 November 2020 at 12.00, Thailand announced that 1,273 additional people met the criteria for PUI, raising the total to 491,425 PUI, as shown in Table 2.

Table 2: Results of screening implementation to detect patients with suspected symptoms of COVID-19

| Situation | Total number of PUI |
|---|---------------------|
| Total number of laboratory tests | 918,835 |
| <ul style="list-style-type: none"> People who met the PUI criteria | 491,425 |
| <ul style="list-style-type: none"> From the Active Case Finding | 15,834 |
| <ul style="list-style-type: none"> Returnees under state quarantine | 81,676 |
| <ul style="list-style-type: none"> People who did not meet the PUI criteria | 329,900 |
| Total number of people who met the criteria of patients under investigation (PUI) | 491,425 |
| <ul style="list-style-type: none"> Detected from ports of entry | 3,435 |
| <ul style="list-style-type: none"> Sought medical services on their own at hospitals (150,427 cases in private hospitals, and 337,475 cases in public hospitals) | 487,902 |
| <ul style="list-style-type: none"> Notified by hotel residences, the Erawan Medical Center, local universities, tour groups and U-Tapao | 88 |
| Confirmed cases | 3,784 |
| <ul style="list-style-type: none"> Recovered and discharged from hospitals | 3,592 |
| <ul style="list-style-type: none"> Undergoing Treatment | 133 |
| <ul style="list-style-type: none"> Deaths | 59 |
| Characteristics of Infection in Confirmed cases | 3,784 |
| <ul style="list-style-type: none"> Local Transmission | 2,451 |
| <ul style="list-style-type: none"> Imported Cases | 1,333 |
| <ul style="list-style-type: none"> - Designated Quarantine Places* | 836 |

Notice: *Quarantine measures for travelers from abroad have been in effect since 3 April 2020

The median age of the confirmed cases is 36 years old (ranging from 1 month to 97 years old). 2,133 cases are male, and 1,651 cases are female (the ratio of male to female is 1.29:1). In terms of nationality, 3,307 cases are Thai, 468 cases are foreigners, and data is not available for the remaining 9 cases.

224 cases were reported with underlying diseases and 3,560 cases reported without any underlying disease. 40 cases were detected from the screening protocol at airports (one case was found within the group of Thai workers returning from Wuhan). 1,588 cases sought medical treatment by themselves, 836 cases were positive from the state quarantine supported by the government. A total of 55 confirmed cases were found from the active case finding measures.

3. Thailand Precautions

- The Department of Disease Control, Ministry of Public Health, revealed the Myanmar migrant worker infected with COVID - 19 in Phatthalung province and a small amount of the genetic material of the virus was found. Today, the blood test results showed the immunity to the virus which reflected a long time COVID - 19 infection. The person was suspected to have been infected from a workplace overseas before smuggling into Thailand. In this regard, the Ministry of Public Health and other relevant agencies in the area will undertake intensive investigations and disease prevention and control measures to build the public confidence in safety.

- The Minister of Transport monitored the preparations to accommodate special tourists and business groups who hold Special Tourist Visa (STV) and visit the passenger screening process of the communicable disease control checkpoint including the secretion sample collection process of the Phuket International Airport. Currently, the screening process and all systems are ready to be implemented. In case the first group of tourists has arrived and the screening system works well, strict measures can be further eased and thus can accommodate more tourists with effective management of the airport, quarantine facilities, tools, equipment and operation processes.

4. Risk Communication to the Public

In case of traveling to areas and across areas by public transport, the public transport operator must prepare the system and comply with the disease control measures, i.e. cleaning the vehicle, screening passengers, encouraging passengers to wear a mask, limiting bus services during certain periods, arranging distance between seats, and limiting the number of passengers. Customers must wear a mask at all times while traveling, refrain from talking and eating on public transport, and register each time they enter/leave the service area.

- For other business places/enterprises, operators are recommended to keep the areas clean, encourage people to wear a mask, limit the number of customers in accordance with the COVID-19 control measures.

- For people visiting crowded places or closed areas such as meeting rooms, department stores, and movie theatres, they are recommended to wear a mask, keep a distance of at least 1-2 meters from other people, and limit contact with other people to be only for a short period of time.

The Coronavirus Disease 2019 Situation

by Emergency Operations Center, Department of Disease Control

- Regularly wash hands with water and soap or use alcohol gel. Avoid touching your eyes, nose, and mouth with your hands.
- Do not use or share personal stuff with others (i.e. handkerchiefs, glasses, and towels) since pathogens causing respiratory disease can be transmitted to other people through secretions.
- Avoid eating raw food.
