Remark: \*PUI (Patients Under Investigation)

### 3. Thailand Imprementations

- The Ministry of Public Health is preparing to vaccinate against COVID -19 to Thai people according to the three-phases plan. Phase 1 from February to April 2021 will be injected to medical personnel and public health outposts, both public and private sectors. People at risk and staff who have the opportunity to contact the patient. The vaccine will be targeted to start vaccination on February 14, 2021. In phase 2 from May to December 2021, when more vaccines can be obtained, the vaccination areas and target groups will be expanded from the 1st phrase to cover all in the country. The 3rd Phase starts from January 2022 onward, there will be enough vaccines to distribute to the entire population in order to create herd immunity and restore the country back to normal situation. In addition, Line Official Account called "Mor Prom" has been created and opened for registration since 12 January 2021. It is the support system for vaccination which will facilitate people and vaccine registration service

units. These will include vaccine recipients registration, follow up side effects, vaccination assessment and additional communication channel with people. All recipients will be followed up their side effects on 1, 7, 30 and 60 days after vaccination.

#### 4. Risk Assessment of COVID-19 Situation

From the COVID-19 situation monitoring, the infected patients continued to be found. Most of the patients are from the disease clusters reported in the main provinces and cities for example, Bangkok with most cases linked to the shopping mall and department stores. Furthermore, most of the recent confirmed cases reported that they had gone to the gathering events and some of them could not confirm where or how they got infected. Therefore, the best method to prevent the spreading of COVID-19 are to avoid the crowded area and to follow the disease control and prevention measures which are keeping social distance, wearing masks, and frequently washing hands, and for anyone who found that they are having high fever or symptoms of coughing, sore throat, losing their ability to smell of taste, please immediately seek medical attention. If every person followed these measures, the spreading of COVID-19 will be greatly reduced.
