### 3. Thailand Implementations

- The Ministry of Public Health announced VUCA principles for Vaccine, Universal Prevention, COVID Free Setting and ATK to be implemented across the country. In this regard, thorough immunization, ultimate self-prevention, ATK screening, as well as a vaccine week, will be conducted in order to provide an infection-free area from November 27 to December 5, 2021, to speed up immunization activities and keep the country safe from COVID-19.
- Thailand's Centre for COVID-19 Situation Administration (CCSA) announced on November 26, 2021, that some easing measures will be planned, especially in entertainment venues, pubs, and bars after the overview of the spread of COVID-19 in many provinces tends to improve.
- Nakhon Ratchasima province announced the readiness to open the city to welcome tourists both Thais and foreigners, according to the SHA standard. It will jointly integrate with public and private sectors to prepare various measures, including the adoption of SHA and SHA Plus standards in tourism establishments. This will make

people in the province and tourists feel confident and safe from the COVID-19 infectious disease and to prepare for the opening of the city on December 1, 2021.

#### 4. Risk Assessment of COVID-19 Situation

The COVID-19 situation monitoring on 24 November 2021, Thailand had 2,081,992 cumulative confirmed cases. Today, there are 5,857 new confirmed cases with 55 deaths. Most cases are high risk groups which are able to become severe symptoms or death. The Ministry of Public Health has prioritized immunization for people as soon as possible, particularly in the tourism areas. The people's immunization needs to be increased in the higher level, especially in the high rate of outbreak areas. In addition, the risk group who are able to develop severe symptoms and death, including the elderly over 60 years old, people living with 7 groups of underlying diseases and pregnant women with gestational age 12 weeks or over. The compliance with preventive measures is still needed and important in order to reduce the spread of the disease. Therefore, people need to wear face masks, keep social distance and wash hands etc.
